

Measuring Fish

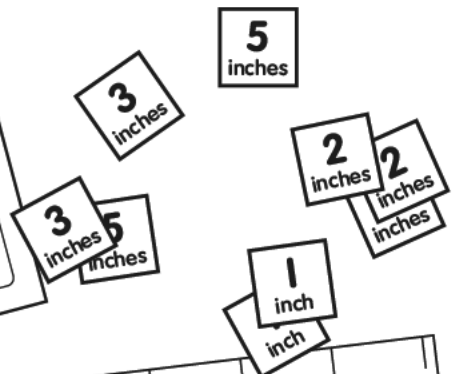

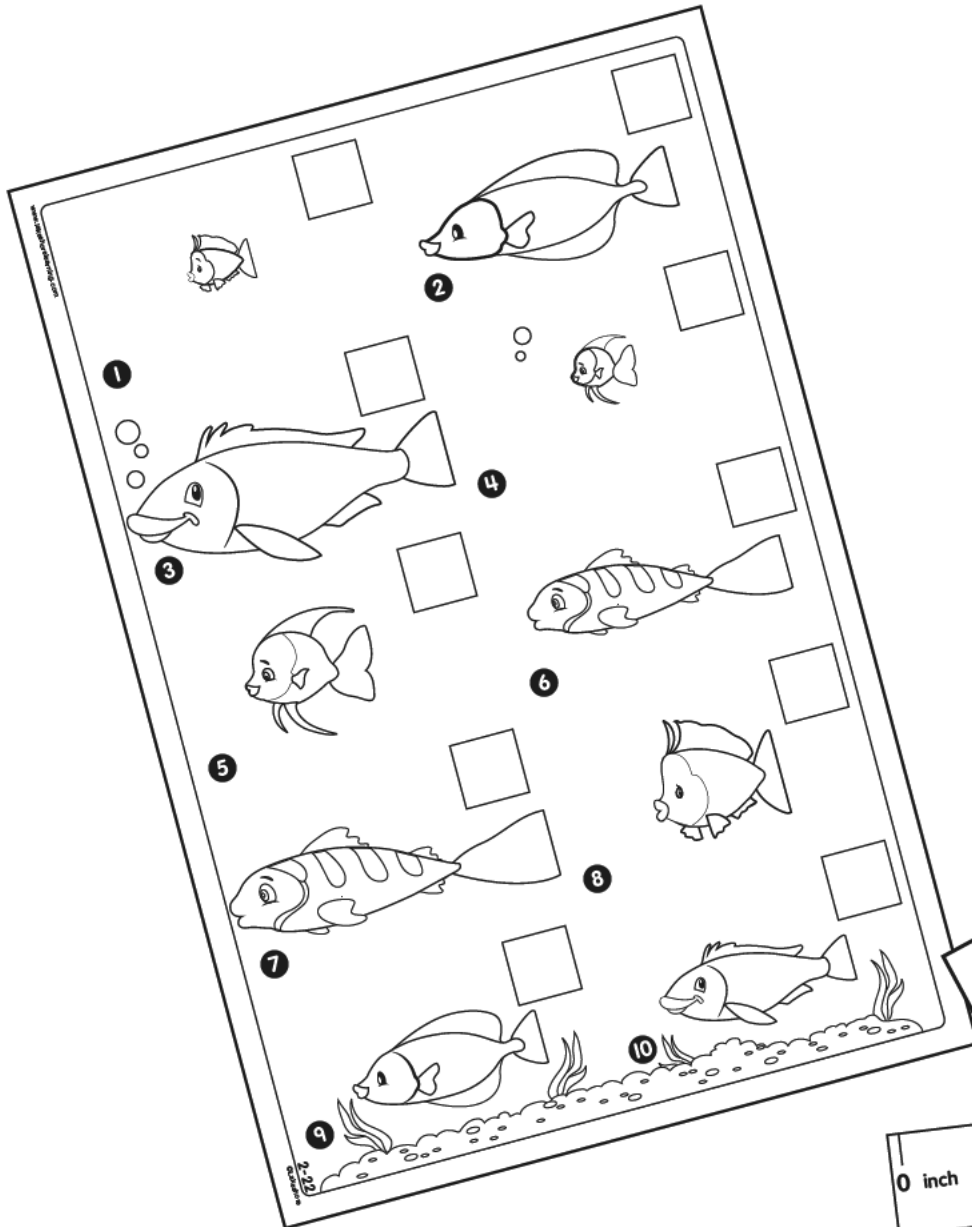

Measurement

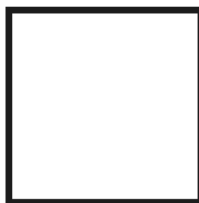

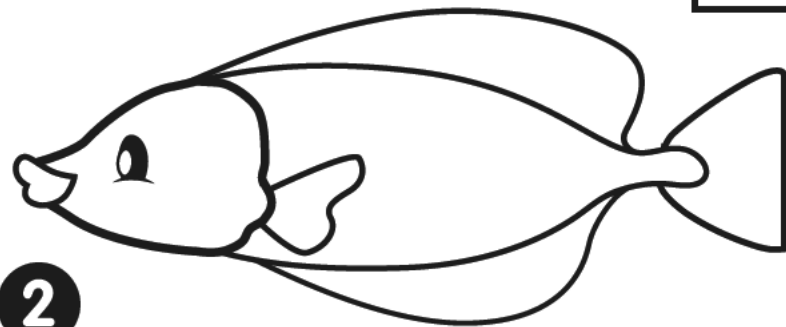

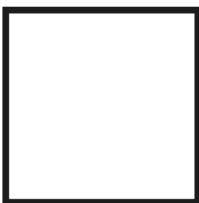

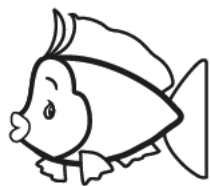

Instructions:

Cut along the dotted lines of the mat pages and tape the mat together. Have your child cut out the ruler and measurement tiles along the dotted lines. Lay all the inch tiles faceup on a flat surface and then invite your child to use the ruler to measure the length of each fish. Your child should then place the measurement tile with the matching length in the box next to the fish. Keep going until your child has measured all 10 fish!

Helpful Hint:

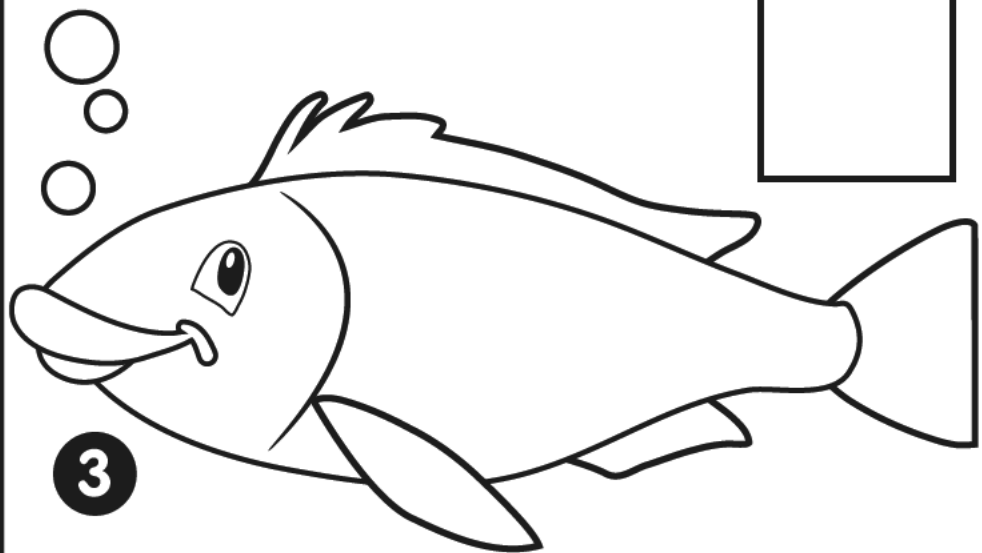

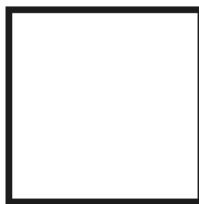

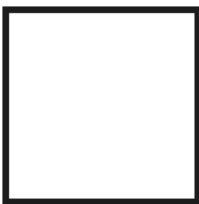

To measure, have your child line up the ruler so that the 0 is at the front end of the fish. The inch mark that is aligned with the end of the fish's tail will tell your child how long the fish is!
